V28.10.3Z Summary of Firmware Changes

Release Date: 31 March 2006

This firmware release is for use with S600 printers with a Hardware ID of 2.2.3 or higher. Beginning with Serial Number 5388121, the **S600** will accept firmware version V28.10.3Z only. V28.8.3 remains available for prienters witha Hardware ID of 2.2.2 or lower.

Important • If firmware released prior to 31 March 2006 is sent to a printer manufactured after 31 March 2006, the printer will go into the download error mode. If the unit is power cycled, the printer will return to using the existing firmware on the unit.

S600 units made after 31 March 2006 can be identified in the following way:

Printer Model	Serial Numbers Above:	Hardware ID*
S600	5388121	2.2.4

* To locate your printer's Hardware ID, print a configuration label.

New Features

- Added Zebra Link compatibility, which was not available in V28.8.3.

Using Older Firmware on Newer Printers

The printer's Hardware ID determines whether or not a printer will accept older firmware.

- If the printer has a Hardware ID of 2.2.3 or higher, it will only accept firmware version V28.10.3Z and higher.

- If the Hardware ID is 2.2.2 or lower, the printer will only accept firmware version V28.8.3 and lower.

Note • Zebra does not distribute the files necessary to change the Hardware ID on a printer.

To determine your printer's Hardware ID and firmware version, print a configuration label and locate `HARDWARE ID` and `FIRMWARE` on the label. To print a configuration label, have the printer loaded and ready to print. Press and hold the CANCEL button while powering on the printer. Release the button after three seconds, and a configuration label will print.
